

PATIENTS ARE TRUE PARTNERS

How Patients Contribute to SQUEEZE?

- Help **design trials** to reflect real patient needs
- Review and improve **patient-facing materials**
- **Simplify language** so it's clear and accessible
- Give feedback on how studies are run to **improve the patient experience**
- Co-develop and **co-design** the SQUEEZE Care Model
- **Shape key research questions**
- Create **patient-friendly** content - brochures, videos, newsletters
- Support outreach and communication through **public-facing materials**

AT A GLANCE

- 3** CLINICAL TRIALS
- 15** PARTNERS
- 10** EUROPEAN COUNTRIES
- €12M** BUDGET
- >30,000** PATIENT DATA

SQUEEZING MOST OUT OF EXISTING RA DRUGS

Personalized treatment and precise dosing for better RA care

PATIENTS

ARE AT THE **HEART** OF OUR RESEARCH

We're working to improve current RA medications and tailor them to each person's needs, so every patient has treatment options that truly work. We involve patients in every step of our research because your voice matters. Together with healthcare professionals, we aim to turn scientific progress into real, everyday care through shared decision-making.

OUR AIMS

- Optimize DMARD selection based on biomarkers
- Enhance patient adherence through personalized care
- Improve efficacy and safety of existing therapies

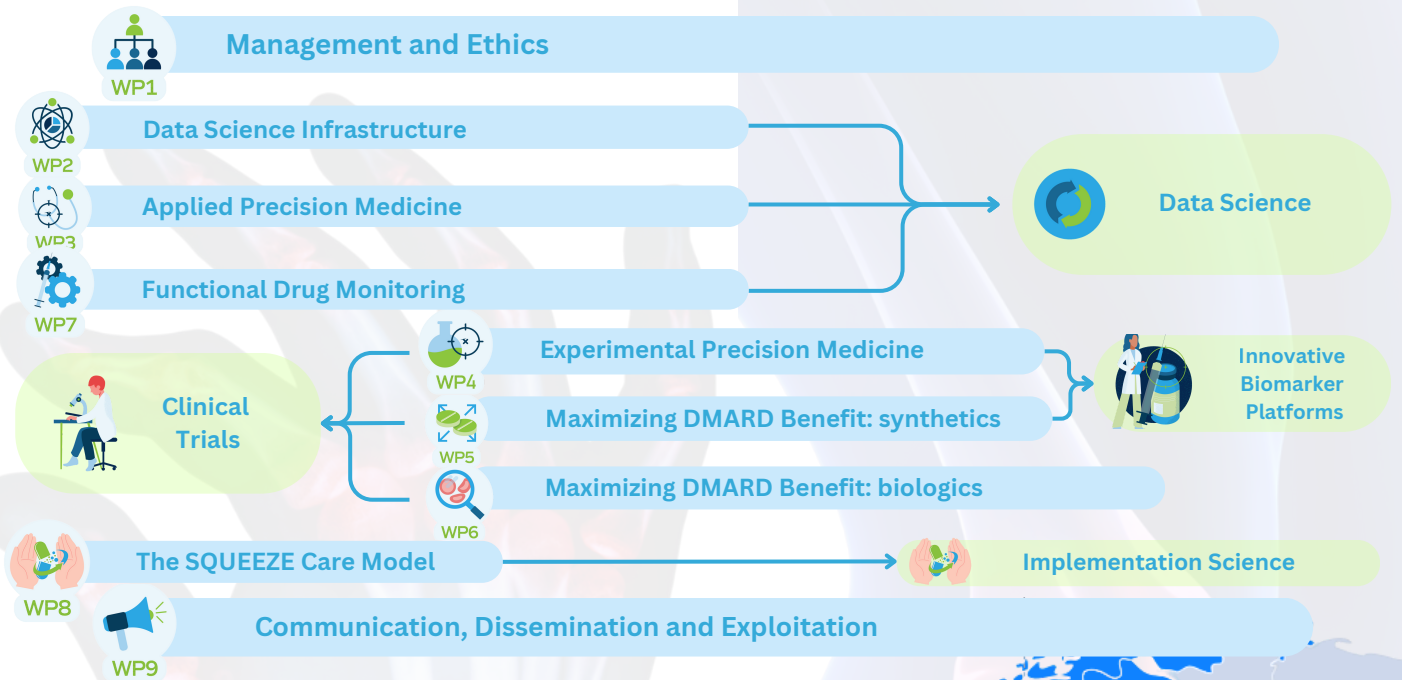

OUR GOAL

Our goal is to provide safer, more effective care that's tailored to each person—relieving symptoms, slowing the disease, and improving daily life for people living with RA.

THE SQUEEZE CARE MODEL

- Combines drug monitoring and data science
- Applies experimental and practical approaches
- Focus on real-life care decisions
- Tailor treatments to biomarkers
- Regularly measure drug levels
- Test new treatment strategies

OUR WORK
